Welcome to Utiform!

Thank you for stopping by the Utiform Forum Community - which I've only just put up!

This forum is here to provide you with answers for any questions you have on machine plastering, material applications, technical issues ... and just about anything you can think of related to machine plastering.

About Me: I've been in the industry since 1997. And machine plastering has come some way since then! In that time I've worked in Dubai, Spain, Germany, France, Belgium and Italy. Over here in the UK I'm approved in the application Webers Monocouche and External Wall Insulation; Knauf MP75 and MP Finish; Parex Render Systems; Sto; CPI; Vandex Waterproofing; and Tarmac Truflo floors.

The forum is obviously a bit empty at the moment. Over the coming weeks, staff, customers and friends will all be invited to post, and I hope we can make this a valuable resource for you.

So stay cool - stay machine plastering B)

Hello and welcome Gary. And good for you - as good a machine as any. (See, I'm not biased purely on the basis of the name printed on the side!)

I haven't spoken to you since Lewis and Paul had their heads up their arses with your generator and delivery. Remember? Of course you do! :blink: But anyway, hope you're doing well and keeping busy with your minijet. B)
